

TopRejser | Wind & Offshore

Special knowledge makes a difference ...

Some industries are highly specialized and therefore need travel consultants with specialized knowledge and experience. Our Marine, Offshore and Wind Energy department have both the experience and the right people. Top Rejser ESBJERG is the competence center within the oil and wind industries since 2005.

Travel related services in collaboration with private partners worldwide ...

ITP (International Travel Partnership) covers one of the fastest growing network alliances between business travel agencies in the world. This means that we can offer service and support in all parts of the world to our Danish and international clients.

How to get the price right ...

Travel consultants at Top Rejser are well trained. They know about aircraft, routes, destinations, travel logical behavior and much more. They know what they are dealing with! This is worth mentioning in a time where many consultants will be trained to use the software, rather than seeing the many opportunities on the market. In simple traveling - point to point it may not matter, but in more complicated travel it makes a difference. Although we are one of the travel agencies that use the most advanced software, it's the professionalism and experience of our consultants that makes a difference, when price and route must be correct.

BUSINESS ONLINE TRAVEL ...

- Put your idea of travel "on hold" – book now, but confirm later.
